

## 20mm Premium Rubber Tile Blue Fleck

The 20mm Rubber Gym Tile is perfect for general gym areas and functional training areas where lighter weights and kettlebells may be dropped.

Easy to Clean

Very Durable

### Technical Specifications

|                                   |                                                                                                                                                  |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Tile Size</b>                  | 1m x 0.5m x 20mm                                                                                                                                 |
| <b>Tile Colour</b>                | Black with a 15% EPDM Blue Fleck                                                                                                                 |
| <b>Tile Material</b>              | 100% Recycled Rubber, NR SBR – Natural Rubber / Styrene-butadiene Rubber                                                                         |
| <b>Base layer</b>                 | 2-3mm granules                                                                                                                                   |
| <b>Surface Layer</b>              | Surface layer fine granules with 15% EPDM Blue fleck.                                                                                            |
| <b>Sound Insulation</b>           | 20dB (ISO 10140-3)                                                                                                                               |
| <b>Floor Hardness</b>             | is 55+/-5 ShA                                                                                                                                    |
| <b>Simple Installation</b>        | Loose lay with the plastic block connector provided.                                                                                             |
| <b>Resistance to chemicals</b>    | Good resistance to acids, alkalis and salts. Contact with oils and hydrocarbons is not advisable and will damage the floor tiles.                |
| <b>Tools Required for Fitting</b> | Stanley knife and Rubber hammer                                                                                                                  |
| <b>Cleaning</b>                   | Vacuum on general setting, then lightly mop with a micro fibre mop and water mixed with a ph neutral cleaner. Do not flood the floor with water. |

### Key Features

|                                                                                          |   |
|------------------------------------------------------------------------------------------|---|
| Easy Cleaning and bacteria-resistant                                                     | • |
