

Dual Series, Pec Fly / Rear Delt

The Gym Gear Dual Series strength line offers a comprehensive solution for fitness facilities where space, budget or both are limited. Featuring 8 dual / multi-functional strength stations, the Dual range can provide a versatile strength training area for a wide range of facilities including boutique studios, hotels and fire stations.

This space efficient, dual functional machine allows users to isolate the pectorals and rear deltoids through a choice of pec or rear delt flys. The adjustable start position, dual handles and narrow back support make it easy for users to position themselves optimally for the exercise selected.
