

HIITMax Training Station with Screen & App

Boost training efficiency with the HIITMax Training Station, a complete solution for structured, full-body HIIT workouts. Built from heavy-duty 3mm steel tubing, it includes an Aqua Bag for conditioning, integrated storage for kettlebells, dumbbells and slam balls, plus a landmine attachment for rotational and core strength work. The multi-grip chin-up station supports a range of pull-up variations for upper-body development.

At the centre of the system is a state-of-the-art 21.5-inch touchscreen monitor featuring the integrated HIITMax Training app. Users can follow progressive workout programmes tailored to different fitness levels, removing the need for a personal trainer while making full use of the HIITMax station and additional training equipment. Ideal for functional, strength and endurance training in both home and commercial gym environments.
