

Platinum Series, Total Hip

The Platinum Series Total Hip is designed to work the abductor, adductor and gluteal muscles through a range of hip abduction, adduction, flexion and extension movements. The adjustable height setting accommodates for any size user and the outward facing support handles ensure safety and stability. This machine is ideal for rehabilitation type exercises in a physical therapy setting. With innovative features the exercisers can tailor the equipment to suit their needs. While clean lines and tubing create an elegantly modern design and premium look, perfect for any fitness setup.
