

Pro Series, Flat-Incline Adjustable Bench

The Gym Gear Pro Series Flat-Incline Adjustable Bench combines commercial quality with a range of features designed for heavy dumbbell workouts. With 10 precision-cut backrest incline positions, from flat to 85 degrees, and a seat pad that adjusts from flat to 30 degrees, it offers excellent versatility. The bench now includes an upgraded handle with a durable rubber and aluminium end cap for improved grip, while the pivot below the pad has been welded for enhanced stability, eliminating screws for a more solid and secure structure. The connection gap has been reduced to minimise wobble, ensuring greater stability during heavy lifts. The welded support bar at the back allows the bench to function like a fixed flat bench when in the flat position, perfect for heavy lifting. Its thick 30mm pads provide exceptional comfort and support. For easy transportation, the bench can be lifted at one end and rolled on two wheels, and it now comes in a single box for simplified packaging and delivery. This upgraded bench combines strength, comfort, and stability, making it an ideal choice for any gym.
