

Prowler Sled Pull Handle Strap

The Prowler Sled Pull Handle Strap is designed to provide a more controlled and effective pulling experience when attached to a Prowler Sled or the XT3+ V2 Power Sled. Offering greater distance from the sled than standard setups, it allows for dynamic movement without the bulk or instability of suspension trainers. Ideal for functional training and perfectly suited to DEKA events, this strap ensures smooth performance, durability, and ease of use in high-intensity functional environments.

High Strength Buckles

Comfortable Grips
