

Rhino Compact

The Rhino Compact strength system is designed to deliver maximum exercise variety within a minimal footprint.

The flat-to-wall Dual Adjustable Pulley comes with 2 x 63.5kg weight stacks, providing smooth and versatile resistance for a wide range of exercises

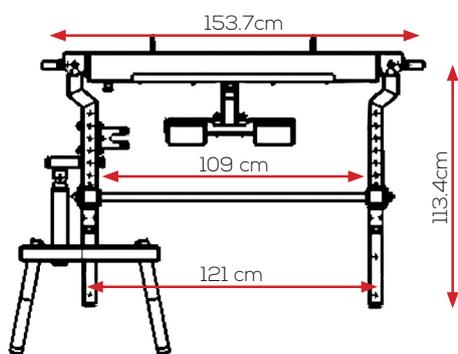

The system also incorporates a folding Half Rack, securely locked in place by the integrated pull-up bar. The Half Rack's uprights pivot easily into position when needed and fold neatly back against the wall when not in use.

Supplied with a comprehensive set of accessories and attachments, the Rhino Compact offers everything required for a complete strength training set-up.
