

Rubber Barbell Sets

Fixed weight barbells are an essential part of any free weight area. They offer an efficient and safe way to incorporate weight training into your fitness program, and can be utilised to increase full body strength.

Highly convenient, fixed barbells do not require any switching of weight plates as they come complete with fixed weights. If you want flexible weight choices, you can either purchase a range of fixed barbells (available from 10kg – 45kg) or you may prefer to purchase barbells with separate weight plates. We also offer a range of weight plates and barbell sets.

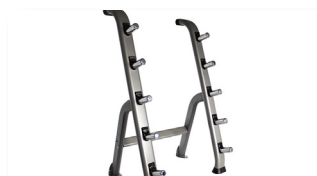

Our fully commercial Gym Gear Rubber Barbells are made to last. The solid steel, encapsulated design complete with Virgin Rubber coating makes for a strong, highly durable piece of kit that won't chip or crack. The fully encapsulated design also eliminates end caps that often become dislodged through extreme use.

Easy Weight Identification

Dual Knurled Grips

5 Barbell Rack

10 Barbell Rack
