

Sled / Sprint Tracks

Our Sprint Tracks are made with the highest quality artificial turf and include Start and Finish markings along with 0.5-meter line markings that will allow you to measure your training sessions! With a 13mm Pile height, the combination of short fibre and the high density of the fibres ensures that our tracks are wear-resistant and durable which means it functions perfectly as a long-lasting sports floor. You can intensely use these sprint tracks on a daily basis for a whole range of fitness activities.

Our heavy-duty Sprint Tracks are suitable for indoor and outdoor use, for prowler sleds, sprinting, plyometrics and other fitness workouts.
