

Sterling Series, 45 Degree Hack Squat

The Sterling Series Hack Squat is a staple in most fitness facilities and is used by many weightlifters for lower-body development. This multi-joint movement loads the quadriceps, hamstrings and glutes, however the primary focus of the exercise can be changed by adjusting your foot position. The safety stop removes any risk of injury and the soft leather cover on the upholstery provides ultimate comfort during use. These features combined with the high-quality construction, make the Sterling Hack Squat a functional, quality piece of kit.

Adjustable Back Support

Olympic Weight Horn
