

Curve 2.0 Plus Treadmill

The Gym Gear Curve Plus 2.0 Treadmill is a motorless Curved Treadmill. Using no electricity but instead running on the energy produced by the runner's own movement, beginners and competitors can run at desired speed and change output at will with no maximum or minimum speed setting. The Curve 2.0 Plus allows users to adjust resistance from Level 1 up to Level 8 for added resistance. Built with HIIT in mind, the Curve 2.0 Plus Treadmill's console keeps you informed on your time, resistance level, calories burned, distance, speed, watts and pace, and more, with a number of heart rate and interval programs available.
