

Rubber Olympic Weight Plates (Dual-Grip)

The Gym Gear Rubber Olympic Weight Plates are perfect for a wide range of weight training exercises, plate-loaded equipment, prowler workouts, and more.

These Olympic Plates are crafted to simplify the process of lifting and loading weights onto bars. With a premium rubber casing, they not only enhance durability but also deliver an appealing aesthetic while safeguarding both floors and plates. The dual grip design ensures convenient and secure handling, while integrated separators prevent any risk of pinched fingers during weight loading or removal. Additionally, the steel inner ring facilitates smooth sliding of the weight on and off the Olympic bar, adding to the overall ease of use.

Dual Grip

Clear Weight Markings

Stainless Steel Inner Ring

Rubber Coating

Technical Specifications

Rating	Commercial
