

Adjustable Kettlebell 3-18kg

Our Adjustable Kettlebell is one that has a core and handle as a base that you will secure plates too as you progress. The locking mechanism is a simple press, slide and pop on system that will minimise the down time between workouts while you transition weights.

It is breathtakingly easy to quickly change the weight depending on your movement, strength and workout routine. With a rapid release mechanism, you will be able to increase and decrease the weight setting, in no time.

This is the perfect addition for your home gym. This impressive, space saving piece of equipment can be tucked away and easily stored.
